

Recovery Room Lock Reference Guide

Electric Lock & Power Supply Installation for AF Recovery Rooms

This guide outlines the responsibilities and recommended equipment for installing electric strikes and power supplies for Recovery Room in Anytime Fitness locations.

Responsibilities

Local Locksmith or General Contractor:

- Install the electric strike and power supply.
- Run cabling between the strike and power supply.
- Ensure strike is securely mounted and aligned with door frame.

Purpose Brands IT Field Services Team:

- Install access control system (reader and door contact).
- Connect access control system to the strike power supply input.

Recommended Equipment

Component	Model	Notes
Electric Strike	HES 5300 Series	• Heavy-duty, surface-mounted strike
Power Supply	Altronix Strike It 4	• Includes relay outputs and battery backup • 115VAC, 60Hz, 2.5A or 230VAC, 50Hz, 1.5A
