2.0 brand moodboard

3.0 symbol

symbol

We are establishing the HC symbol as a key brand element that can be used on its own. The primary 1-color HC symbol is HC Green. The primary version is used on a white or very light background.

The white HC symbol may be used on brand colored backgrounds and photographs.

When placing the symbol on colored backgrounds, refer to section 6.1 Color: Accessibility Standards in this guide for acceptable combinations.

Where color is unavailable the HC symbol may be used in HC Grey Dark, HC Grey Mid, or white.

3.0 symbol unacceptable usage

The examples shown here are some of the unacceptable usages of our symbol.

5.0 logo lockups

There are three lockup combinations for the Healthy Contributions brand. Each combination is available in color, greyscale, and white to accommodate the environment where used.

as brand

To be used in all high-profile branded moments such as signage, marketing, brochures, etc.

The primary logo application may or may not include the brand tagline

The brand tagline should never appear separately from the logo

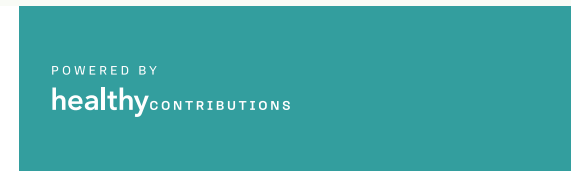

as endorser

When Healthy Contributions is in a supporting role, the wordmark is used

The wordmark should appear below the partner logo, connected to it with the "POWERED BY" phrase

"POWERED BY" and the wordmark should appear in grey or white only

Never use the symbol or tagline in this instance

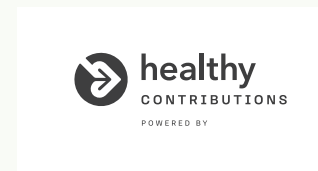

as endorsee

When Healthy Contributions is in a primary role, the logo is used

The logo should appear above the partner logo, connected to it with the "POWERED BY" phrase

The logo should appear in full color whenever possible

Never use the tagline in this instance

5.1 logo lockups

usage

Here are a few examples of how the three logo lockup combinations can work.

6.1 color hierarchy

The chart at right shows the color percentage breakdown. When creating any branded materials, make sure the color balance follows this chart.

It's vital that our **primary colors**—the HC Greens and the HC Blues—are the foundation of all creative applications.

Our **secondary colors**—HC Beet Burgundy and the HC Beet Pinks—may be applied as accents but never as lead colors in any of our materials.

Our **neutral hues**—HC Cream and the HC Greys—play an important role in supporting our primary and secondary color palette as background tones and color options for text.

6.2 color accessibility standards

The following color combinations meet WCAG 2.1 AAA or AA guidelines for accessible text contrast in digital designs. When placing type or iconography on a background color, these examples have a contrast ratio of at least 4.5:1. This ensures inclusive branding and meets the requirements of the Americans with Disabilities Act (ADA).

Color combinations are cleared for use in digital applications as noted below.

Combinations outside those shown here should not be used.
